

Inspiration for the Paso Tri comes from the iconic tri-clover leaf found in the Danish fields during spring and summer. Thomas Darø has in the design process interpreted the delicate shape of the tri-clover leaf and extended it into the shape of the Paso tri design. At the top of the floor and table lamp you will find the clear shape of the tri-clover leaf which extends delicately into the legs. The cable runs discreetly inside one of the legs which supports the delicate design and gives a clean and light impression.
